

You will see the light.

Coming in September.
Small • Powerful • Performance

The rumors are true! This September Amerlux will introduce our latest breakthrough in LED lighting.

Don't be fooled by its small size. This compact, high-performance module packs a punch by delivering superior lumen output and precise CBCP equal to that of any 50W low-voltage MR16 fixture.

With its field interchangeable optics, this product is a true replacement fixture for the low-voltage MR16 – and it comes standard with dimming, 50,000 hours of life, and our industry-leading 10-year limited warranty.

Once again, Amerlux is advancing LED lighting technology. To find out more, please email Russ at RFerdico@amerlux.com.
