COMFORT VUE

collection

Unbeatable Comfort. Uncompromising Performance.

Comfort Vue by Amerlux sets a new standard for linear lighting, delivering industry-best visual comfort without sacrificing performance. By virtually eliminating glare, it creates visually quiet, sophisticated spaces where the architecture and its occupants are the focus, not the light source.

KEY FEATURES

1 Unrivaled Visual Comfort

Our proprietary optical system combines deeply regressed LEDs, miniature metallized reflectors, and molded louvers to deliver industry-leading visual comfort. With a high shielding angle (see figure 1) and a **Unified Glare Rating (UGR) of effectively zero**, (see figure 2) it's a system designed to make the fixture disappear, leaving only high-quality, comfortable light.

Figure 1 – Shielding & Cut-Off Angles

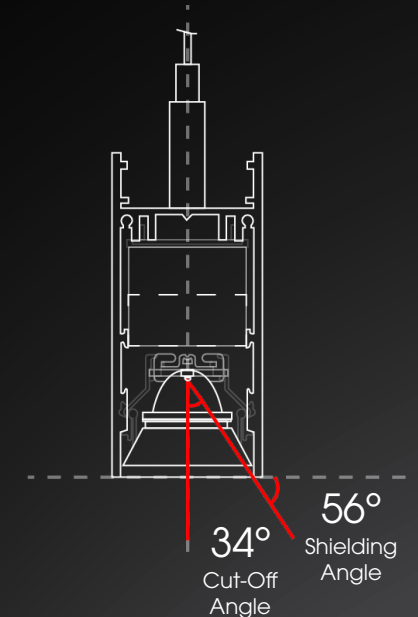

Figure 2 – UGR Values

	Black Louver	White Louver	Chrome Louver
UGR	<5.2	<5.3	<5.3

UGR values calculated using UGR table method

- Tested with 50° beam, 3500K, 90CRI, 10W/ft
- Lowest possible theoretical UGR value is 5. UGR<10 is considered imperceptible.

KEY FEATURES (Continued...)

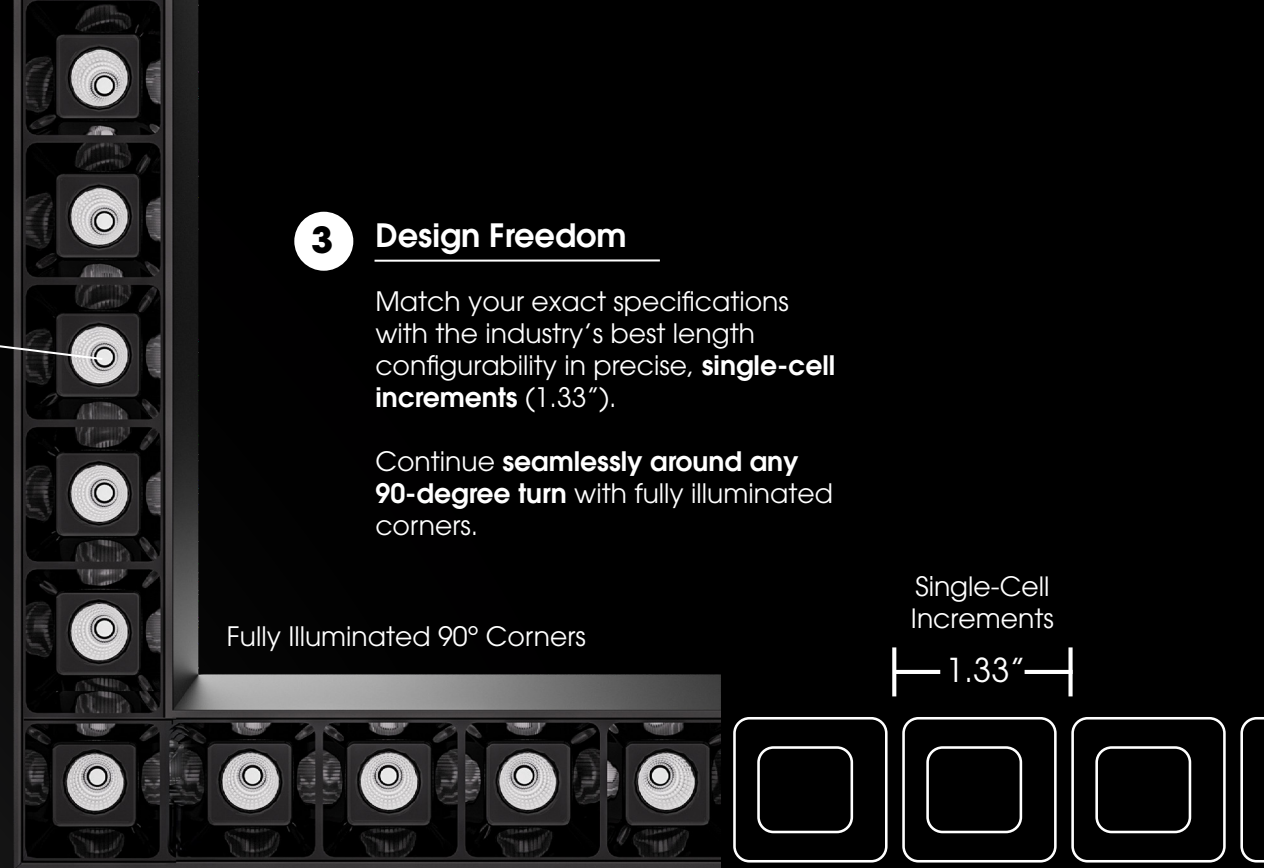

2 Superior Color Performance

Specialized LEDs provide superior color-over-angle performance for a beam free from color variance. And with 90 CRI as standard, expect high-quality illumination for any space.

3 Design Freedom

Match your exact specifications with the industry's best length configurability in precise, **single-cell increments** (1.33").

Continue **seamlessly around any 90-degree turn** with fully illuminated corners.

COMFORT VUE FAMILY

Comfort Vue offers a complete family of tailored solutions for every application:

Comfort Vue

Provides louvered direct illumination, with an optional batwing indirect distribution.

Comfort Vue Perimeter

Featuring a specialized optic with a smoothing film to deliver an even wall illumination, free of scalloping.

Comfort Vue Combo

Allows custom combinations of louvered sections, lensed sections, and blank plates. An optional batwing indirect distribution is also available.

Comfort Vue utilizes Amerlux's proprietary Cellular Louver optics to create comfortable, visually quiet spaces. It is available with 15°, 30°, and 50° beam angles and can be specified in pendant, surface, or recessed mounting configurations, all within a sleek 1.5" housing. Tailor the aesthetic with three distinct louver finishes—Piano Black, Glossy White, and Polished Chrome. With an optional indirect batwing beam available to add soft ambient light. Get uninterrupted illumination with the ability to specify lengths in single-cell increments and fully illuminated corners.

Details

Engineered to provide even illumination on vertical surfaces, Comfort Vue Perimeter uses a specialized optic with a unique smoothing film to deliver illumination on the wall that is free of scalloping. Housed in a 2" profile with slightly regressed louvers for a clean look, it creates a sophisticated aesthetic that enhances any space. Like the standard Comfort Vue, it is available in single-cell increments with fully illuminated corners for continuous runs.

Comfort Vue Combo empowers designers to create custom lighting solutions. This versatile system allows you to combine the superior comfort of our Cellular Louver optics with the powerful punch of lensed lambertian or asymmetric beams for ambient lighting or wallwashing. By integrating louvered sections, lensed optics, and even blank plates into a single run, you can create tailored configurations to match the exact needs of the space. An indirect batwing beam is also available.
