

Rook X Pole Mount

Features

The Rook X Pole Mount family takes adjustable lighting to next level. Allowing multiple Rook X Adjustable accents to be pole mounted creates flexibility in putting light just where needed in any outdoor environment. Several standard mounting configurations from 1 to 4 fixtures are available with both versions of the Rook X adjustable fixtures. Various optical accessories, beam shaping films or a hexcell louver can be configured at the time of order and can be changed in the field if needed.

Product Overview

Type:	Exterior Pole Mounted System for Adjustable Accents
Wattage:	12W
Color Temp:	2700K, 3000K, 3500K, 4000K
CRI:	83 typ. or 90+ typ.
Dimming:	Integrated driver with 3 dimming protocols is standard (TRIAC & ELV or 0-10V), 120-277V
Operating Temp:	-40° to +40° C

PROJECT:

TYPE:

Post Top model shown with Rear Mount Accents

Post Top model shown with Side Mount Accents

Also available as a clamp on collar mount for 4" or 5" OD poles with 1 or 2 fixtures per collar. CM4 (4") & CM5 (5")

Application:

Pole mounted exterior accent lighting for landscape, patio, hardscape, building facade or signage.

Luminaire Construction:

- Machined aluminum housing and die-cast knuckle assembly
- IP66 sealed optical chamber and integral driver chamber
- Flush lens prevents puddles/water deposits in upward facing applications
- 180°+ adjustability in the knuckle
- Infinitely adjustable within the vertical aiming range using tapered locking mechanism.

Optics:

- 17°, 22°, 28°, 45°, 60°, 60x20, 90x60
- 90x60 beam spreads are available with secondary shaping lens

Electrical:

- Integral tri-dim driver
- Input voltage 120V-277V auto-sensing
- Drive current 300mA
- Power consumption 12W

Luminaire Mounting:

- Fixture threads onto fixed pole couplings with supplied 1/2" threaded stainless steel nipple. Coupling and fixture include set screw to lock horizontal rotation in place.

Optical Accessories:

- Hexcell Louver (HEX)
- Requires AL (Accessory mount lens):
- Full Glare Shield (FGS)
- Half Glare Shield (HGS)
- Visor Shield (VS)

Finish:

Premium quality thermoset polyester powdercoat for a durable finish.

ETL listed, suitable for wet locations.

DIMMING COMPATIBILITY:

Amerlux® Rook fixtures are compatible with most major dimming protocols prevalent in the United States. Please see below for general compatibilities and wiring diagrams. Amerlux recommends testing your unique dimming configuration as the exact full configuration (Dimmer, Fixture Quantity, Voltage, etc) may affect dimming performance.

--- NOTE: INFORMATION BELOW IS FOR WIRED DIMMERS ONLY. FOR WIRELESS DIMMERS, CONSULT FACTORY ---

TRIAC (Forward Phase) DIMMING (Standard) or ELV - Electronic Low Voltage (Reverse Phase) DIMMING (Standard) TRIAC or ELV Wiring Diagram

Notes:

- TRIAC/ELV dimming at 120V only (dimming to 1%)
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!
- Must meet dimmer Minimum Load Requirements per dimming manufacturer

* Pink & Purple wires are not used for TRIAC/ELV dimmer.

0-10V - DIMMING (-0-10V Option)

Integrates into a variety of building management and daylighting controls

Notes:

- 0-10V dimming at 120V or 277V* (dimming to 2%)
- Requires interface to turn off power to driver
- Consult Dimming manufacturer for installation instructions - DO NOT SHARE NEUTRALS!

0-10V Wiring Diagram

Notes:

- * Driver is 277V dimmable with appropriate dimmer (by others). All provided wiring diagrams show 120V wiring colors and method. Please refer to 277V dimmer installation instructions for 277V wiring diagrams.
- † The absence of a dimmer from the lists above does not imply incompatibility. Please consult factory for compatibility inquiries.
