Amerlux P/N:
648-0140

Fixture MoR (Sold / Shipped Separately)

Creating a Beginning of Run (BoR)

1: Remove Latch

Via (2) Screws. Discard.

2: Install Cable Gripper

Make sure gripper is tightly secured.

3: Install End Cap

A. Remove adhesive strip's non-stick covers

***INSTALL POWER FEED**

BEFORE END CAP*

See 689-0736 / 0737 / 0738 / 0739
(Located in Feed Kit)

B. Firmly attach end cap

Embossments on end cap to line up with extrusion profile as shown

C. Secure end cap with provided

#6-32x1/4" screw*

*** DO NOT over tighten screw. Hand Tightening is recommended.**
(Over tightening will cause bottom of end cap to separate from fixture)

Correct

End cap should sit flush with side of housing extrusion as shown

If End Cap separates as shown, loosen screw until it sits flush

Incorrect

Complete BoR

Creating an End of Run (EoR)

1: Remove Shields & Pins

Using pliers, remove all (3) light leak shields and (2) alignment pins. Discard.

2: Remove Catch

Via (1) Screws. Discard.

3: Install End Cap

A. Remove adhesive strip's non-stick covers

*INSTALL POWER FEED

BEFORE END CAP*

See 689-0736 / 0737 / 0738 / 0739
(Located in Feed Kit)

B. Firmly attach end cap

Embossments on end cap to line up with extrusion profile as shown

C. Secure end cap with provided

#6-32x $\frac{1}{4}$ screw*

* **DO NOT** over tighten screw.
Hand Tightening is recommended.
(Over tightening will cause bottom of end cap to separate from fixture)

Correct
End cap should sit flush with side of housing extrusion as shown

If End Cap separates as shown, loosen screw until it sits flush

Incorrect

Complete EoR

Creating an Individual (IND)

To create an IND fixture, please follow
ALL steps from BoR & EoR creation
