

Curvano® 2.5"

Curved Linear Direct

PROJECT:

TYPE:

Features

Curvano expands on the existing linear slot portfolio of Amerlux, further putting the “arch” in first-class architectural lighting. The 2.5” profile is available in 5 diameter options, as either a curved corner or full 360° circle. With the ability to fit in seamlessly anywhere on your project, from the simplest design to the most complex, Curvano provides infinite design and lighting patterns options: circular, serpentine and rounded-circle displays included. Trust Curvano to provide the freedom to create—and maintain—dynamic, head-turning spaces.

Product Overview

Type:	Pendant/Surface Mount Direct
Wattage:	3W-10W/ft
Color Temp:	2700K, 3000K, 3500K, 4000K
CRI:	83 or 90+ typ.
Dimming (wired):	0-10V, 1% dim (standard) Lutron LDE1 Hi-lume® 1% Soft-On/Fade-to-Black DALI, 1% dim

Certifications

Fixture Summary

Performance Data

Wattage per Foot	Delivered Lumens	Lumens per Foot	Lumens per Watt
5	1672	418	84.6
10	3059	765	77.6

Data is based on 4' fixture with Designer Lens, 3500K-80 120V IES files available on website.

Electrical Data

Wattage per Foot	Voltage	System Watts	Amps
5	120V	20	0.16
	277V	20.8	0.08
10	120V	39.7	0.33
	277V	39.7	0.15

Electronic multi-volt (120-277VAC), constant current LED driver, 4' fixture.

Diameter and Angle Options

Arc length is the center line length if the curve was straightened out.

45°	
Diameter	Arc Length
D43	16.89"
D72	28.08"
D100	39.27"

90°	
Diameter	Arc Length
D22	16.98"
D36	28.18"
D43	33.77"
D72	56.16"
D100	78.54"

360°	
Diameter	Arc Length
D22	67.54"
D36	112.72"
D43	135.09"
D72*	224.62"
D100*	314.16"

Standard Patterns

PLL - L Left, (2) straights + (1) corner, leg right
PLR - L Right, (2) straights + (1) corner, leg left
 Provide overall lengths: A' & B'; Diameter & Angle of corner
Example: 4'x8'.D43xA90.PLL

PR - Closed Rectangle, (4) straight lengths + (4) 90° corners
 Provide overall lengths: A' & B'; Diameter
Example: 12'x10'.D22.PR

PU - Open U, (3) straights + (2) corners
 Provide overall lengths: A' & B' & C'; Diameter & Angle of corners
Example: 4'x10'.D72xA90.PU

PZ - Open Z, (3) straights + (2) corners
 Provide overall lengths: A' & B' & C'; Diameter & Angle of corners
Example: 12'x6'x10'.D36XA90.PZ

Curvano® 2.5"

Curved Linear Direct

PROJECT:

TYPE:

Specifications

Application

Retail and commercial ambient lighting that can be customized with a variety of diameters and angles to create any curved pattern or variety of illuminated circles.

Construction

Extruded aluminum housing. Die-cast End Plates match fixture body finish. Die-formed, cold-rolled steel internal components are protected against rust and corrosion.

Optical

Laser cut acrylic lens, with lift and shift lay-in design. Maximum length is 8' and maximum angle is 90° (ex. 180° curve will have 2 lenses; Circle will have 4 lenses). All lenses ship installed into fixture. Amerlux's proprietary acrylic lens provide excellent transmission while effectively concealing source image.

DL - Designer Lens provides flat even glow on lens

UC - Upper Clear Lens cover

BAT - Batwing upright (only available in straight runs)

LED

Amerlux fixtures have excellent thermal management and offer a 5 year warranty. Our LED binning is within 3 MacAdam ellipse. Boards are configured for maximum flexibility resulting in even illumination no matter the fixture layout. LED boards are easily replaced in the field with just a Phillips screw driver.

Color Temperature Options: 2700K, 3000K, 3500K, 4000K

CRI: 83 or 90+ typical

R9: 16 @ CRI 83; >50 @ CRI 90+

Life: 50,000+ hr., > 70% of initial lumens (L70)

Electrical

Wiring: Individual and "Beginning of Run" (BOR) fixtures are prewired with power cord. All configurations have quick connect power harnesses for row connections.

1 - 1 Circuit, direct & indirect same circuit

2 - 2 Circuits, direct & indirect switch separately (power feed at both ends)

Remote Driver Wiring (D22, D36 & D43 ARC or CIR only): Driver is supplied installed in remote driver box, (one driver per box), with 5' of low voltage plenum rated cable. Fixture supplied with 18/2 SJT power cord ready to be connected to J-Box (by others) over cable canopy. Amerlux recommends a maximum of 15' between the fixture and the remote driver box. Consult factory with job specific electrical spec if more than 15' is required. Feeds are added as required by specified wattage and driver maximums. See page 5 for wiring illustration

Standard Wattage: 3-10 W/ft (3W & 4W have a minimum length of 4'). Emergency circuit via remote invert or auxiliary emergency power supply (by others)

This product complies with IEEE C62.41 for surge endurance up to 2.5KV.

Amerlux® recommends using additional surge protection with this unit (supplied by others), surge and over voltage damage is not covered under warranty.

ENLS - Enlighted Sensor (0-10V driver only, not available in 2' & 3' lengths, and can only be used on one circuit). Limited to straight fixtures only.

EMC-PF - Emergency circuit requires power feed to be located in last fixture section for continuous runs. For other locations consult factory. Not available for individual (IND) configuration.

PF - Extra power feed for additional circuiting. Not available for individual (IND) configuration.

EMB - Emergency battery pack - 10W output power, 90 min of illumination time. Illuminated test-switch/charging indicator light is provided. Wattage consumption by EMB: 2.5W/ft (4ft fixture), 1.66W/ft (6ft fixture), 1.25W/ft (8ft fixture). Request can be made to light up 4ft section on 8ft unit.

Finish

All painted surfaces are premium powder coated baked on for maximum durability and color stability.

HW - High reflective matte White

BT - Black Texture

ST - Silver Texture

For special paint colors supply RAL and/or actual paint chip for factory consultation.

Configurations/Lengths

IND - Individual straights are standalone fixtures made of single lengths of 2' to 8' (in 1' increments). They are supplied with matching painted End Caps and the required mounting hardware. Lengths less than 4' may have restrictions based upon wattage, lengths, drivers or other options.

CON - Continuous runs are longer than 8', specified to the nearest whole foot. Continuous runs less than 16' are made of 2 lengths. Continuous runs longer than 16' start with a 8' Beginning of Row (BoR) wired with a power feed and fitted with an End Cap. The majority of the runs are made up of 8' Middle of Run (MoR) lengths. End of Run (EoR) units are made up of 2' to 8' units to the nearest whole foot or a combination of a last 4' MoR and a 5', 6' or 7' EoR. Runs longer than 60' may require a second power feed. Factory installed pins and splines simplify fixture alignment. Lengths are quickly joined with "catch and latch" mechanisms or screws and sturdy brackets. Quick connectors simplify field wiring.

CUS - Custom made to measure runs are made to nearest 1/8" of customer supplied field measurements. They can be a single custom length or runs configured as described above only EoR's are 2' to 8' cut to the nearest 1/8" exact length or a combination of a last 4' MoR with an EoR cut to exact length to the nearest 1/8".

ARC - Individual arcs are standalone fixtures made of single lengths using a diameter and an angle (ex. D43 x A90 is a 4' diameter, 90° individual fixture). They are supplied with matching painted End Caps and the required mounting hardware. All diameters utilize a remote mounted driver.

CIR - Circle fixtures made up of a single housing (D22, D36 & D43) or shipped in 90° segments (D72, D100). All diameters utilize a remote mounted driver.

PLL/PLR/PR/PU/PZ - Standard patterns consist of standard diameter & angle corners with standard lengths (3' to 8' in 1' increments) or custom lengths. Patterns with multiple corners will have the same diameter and angle utilized throughout the pattern. Depending upon complexity of the pattern, drawings may be required. When ordering please give overall lengths. See page 3 for layouts.

PC - Custom patterns use standard or custom lengths, 90° or other corner angles with some limitations. Please provide drawings and consult factory.

Mounting

CURV2.5D....ASW10 - Direct/Indirect installed in center of ceiling tile or gypsum board ceiling, (standard) i.e. ASW10. Or if canopy is installed on a grid Tee runner add, T i.e. ASW10T.

Cable Suspension: Cable is stranded stainless steel wire supplied with cable gripper and 5"x .250" steel die formed canopy. All components are protected against rust and corrosion. Power feeds are 16 gauge 3 or 5 conductor SJT cord supplies in same color as canopy. Amerlux supplies the required feed and non-feed suspension kits based upon length, electrical options and customer requirements. Suspension kit options include: color, length and mounting condition.

Mini Cable Suspension: 5" diameter by 0.25" canopy is used for both feed and non-feed Mini Cable Kits. The thinner Low Voltage power feeds are 22 gauge 2 conductor SJT cords supplied in same color as canopy. Amerlux supplies the required feed and non-feed suspension kits based upon length, electrical options and customer requirements. Suspension kit options include: color and mounting condition.

Surface Mounting: Housing needs to be attached to solid structure above. Mounting holes are pre-drilled at factory. Some fixture disassembly and reassembly required. Mounting hardware by others.

Certifications

Approved to UL standards as tested by CSA. Intended for indoor use only

Warranty

Amerlux's 5 year limited warranty. Please consult Amerlux website for details.

Curvano® 2.5"

Curved Linear Direct

PROJECT:

TYPE:

Product Details

Cross Section

Pendant Mount

Surface Mount

Lens Install/Removal

Insert Lens into one side at an angle and push into flexible lens clip. Tilt lens up past bottom flange and into fixture.

If lens shows a gap on one side squeeze fixture to center lens between lens clips.

Insert putty knife under lens and pry lens to one side. Continue until one side of lens comes out.

Circle Lens

Rounded Corner Lens

Tool-less Joining

Line up the two housings by using the alignment pins & splines. Secure them together by using the Catch & Latch System on the top of or inside the extrusion.

Remote Driver

D22/36/43 ARC & CIR configurations only

Note: Driver required for every 4'. Remote drivers can be installed up to 15' max from fixture.

TYPE:

Dimming Compatibility

Amerlux® Carisma fixtures are compatible with all major dimming protocols prevalent in the United States. Please see below for general compatibilities and wiring diagrams. Amerlux recommends testing your unique dimming configuration as the exact full configuration (*Dimmer, Fixture Quantity, Voltage, etc*) may affect dimming performance.

--- NOTE: INFORMATION BELOW IS FOR WIRED DIMMERS ONLY. FOR WIRELESS DIMMERS, CONSULT FACTORY ---

0-10V - DIMMING (Standard)

Integrates into a variety of building management and daylighting controls

Notes:

- 120V or 277V*
- Dims down to 1% light output
- Requires interface to turn off power to driver
- Consult Dimming manufacturer for installation instructions - **DO NOT SHARE NEUTRALS!**

0-10V Wiring Diagram

Compatible Dimmers†:			Central System
Wall Box
