

Amerlux opens new showroom in Houston, Texas-based Facility

Houston, TX --- To showcase its product line in the important southwest market and surrounding areas, Amerlux is opening a new showroom in its Houston, Texas-based manufacturing and distribution facility. The showroom was created for agents, specifiers, contractors and end-users to view the most advanced energy efficient lighting solutions for commercial, supermarket, retail, hospitality, and exterior applications. The showroom is located at 3450 South Sam Houston Pkwy E., Suite 400, Houston, Texas. The direct phone number is 1.281.997.5400.

“Our Texas-based facility will now include an expansive lighting showroom that can be used to demonstrate our latest lighting products for end-users, designers, architects and other specifiers,” said Amerlux CEO/President Chuck Campagna. “The showroom features a broad range of our key LED product displays, including Linea, Gräv, Evoke, Hornet, Essenza, Cynch, Lunetta and Avista.”

The Linea family drives the design scenario seamlessly with streamlined and flexible architectural LED Linear pendants that provide the freedom to create truly dynamic spaces. A synthesis of aesthetics, performance and energy efficiency, the Linea family delivers direct, indirect and wall wash LED lighting.

Prized for classic good looks, performance and flexibility, Gräv recessed linear fixtures have taken a turn for the edgy. This Bauhaus-influenced family of linear LEDs has expanded by getting smaller with the ability to climb walls, cross ceilings, and literally go everywhere a designer wants it to be.

Evoke® provides various wattage options with industry leading cutoff for glare control, higher lumen deployment and precise delivery of consistent color and beam quality. Available in round and square apertures with trimmed or trimless styling, Evoke is Amerlux’s premium grade downlight that is suitable for a broad range of general, accent, task and

display applications.

Hornet® HP Downlights and Recessed Multiples offer a high performing alternative for designers. Small and compact, the luminaires deliver the power of CMH fixtures, but surpass them with enhanced control, instant-on, dimmability and long lifespan. Hornet® HP's quality, energy efficient light source provides better maintained and more secure lumens, with consistent color rendering.

Essenza LED Downlights are designed to deliver the features required for hotel, residential and high-rise projects. Available with high lumen and CRI LED modules, Essenza offers downlight, adjustable accent, wall wash, and lensed shower trims that provide designers the ability to complete any interior scheme. Standard ELV or Triac dimming is available to meet today's energy codes.

The versatile Cynch changes the game in hospitality and retail environments, by converting in an instant, from accent to pendant in the field. Its magnetic connection allows a quick change with one pull, disconnecting the electrical connection.

Lunetta brings soft, lambertian light distribution at ground level that is perfect for artistically lining plazas, pedestrian ways, and sidewalks. Lunetta breaks from convention by allowing both head and post to become illuminated as one while hidden LEDs create a glare-free gradated look, reinventing the nightscape. A perfect blend of form and function, Lunetta is beautiful in its simplicity and the visual drama it creates. Two post top options for different mounting heights, as well as a bollard and wall mount, are offered.

Taking exterior lighting to the next level, Avista is an advanced LED light engine for retrofitting traditional and post top luminaires, as well as new construction. Unique with a completely sealed LED optical chamber, the super energy-efficient Avista offers cutting-edge optics and extraordinary output. Simple to install with adjustable height levels, it allows the user to position light for maximum performance.

About Amerlux LLC

Amerlux speaks the language of light for design and construction professionals around the world by manufacturing a broad array of optically superior, energy efficient lighting solutions for the retail, supermarket, hospitality, commercial and exterior lighting markets. Amerlux products and services include track lighting, recessed downlighting and multiples, pendants, linear fluorescents, and custom lighting systems, as well as support for energy reduction plans that can be used as a guide to state, city and local utility rebate programs for maximum energy savings and utility incentives. The company's domestic and international clients receive the support of Amerlux's highly trained specification sales force, as well as expert service from initial design to on-time delivery made possible by strategically located manufacturing, warehousing and shipping locations.
