

Amerlux's New Rook X Solutions Ensure a Uniform Design Inside Out

*Exterior Adjustable Accent, Pendant and Surface Mounts
Complete Rook Indoor/Outdoor Lighting Family*

OAKLAND, N.J. - January 12, 2023 - [Amerlux](#), an award-winning design-and-manufacture lighting company, announced today that it has added adjustable accents, pendant mount and surface mount to its [Rook X family of LED exterior architectural luminaires](#), giving architects and lighting designers a complete set of options to extend their interior allure outdoors with ease.

Perfect for commercial, hospitality, institutional and high-end retail applications, the Rook X adjustable accents, pendant mount and surface mount compliment the original Rook X exterior wall mount by delivering its trademark after-dark effect on any building façade, landscape or canopy ceiling. It can also serve as additional lighting on pedestrian light poles. Moreover, all Rook X fixtures provide an integral driver that shortens installation and the same quality look and feel of the family's interior pendant and wall mount lineup.

“Amerlux continues to make a business out of listening to the marketplace,” said Bill Plageman, Amerlux's VP of Marketing. “Architects and lighting designers want a comprehensive set of tools that share the same aesthetics, performance and aperture size to complete their spaces inside, outside and all around. That's why we've developed an interior and exterior family of solutions with so many options. Our Rook family is now complete, much like the projects they finish with style.”

With only a 2" aperture, the [Rook X additions](#) offer seamless sides and no visible hardware, ensuring water-tight, long-lasting durability in all weather conditions. They also provide multiple mounting options, several external glare shields and beam spreads, and five elegant, discrete finishes that blend in gorgeously with any architectural facade.

Sustainably manufactured and domestically engineered with precision-machined extruded aluminum housing and die cast components, the [Rook X family](#) splashes

beauty and character onto any modern or traditional outdoor landscape, architecture and post-mounted layout. Four color temperatures are available (2700K, 3000K, 3500K and 4000K) as well as 83CRI or 90+ CRI. Three dimming protocols—TRIAC, ELV and 0-10V—are standard.

The Rook X adjustable accent comes with a rear-mount or side-mount knuckle that's ideal for sign lighting, wall mounting and rigid-stem mount inside patios.

For all [Rook X fixtures](#), the primary optic produces a 15-degree (spot) beam, and all other optics use a secondary film. The optical distribution can be easily changed in the field by adding or replacing the secondary optics. Also for all models, the Accessory Mount Lens (AL) enables shielding accessories. Shields are rotatable to any orientation and removable while the optical system stays sealed.

A Continued Legacy

Architects and designers don't have to go far to find other opportunities to complete their spaces with Rook's complete family of interior and exterior lighting solutions.

For instance, the clean-styling Rook X exterior wall mount cylinder offers a 2" aperture in dual output (up/down light) or single-sided (up-light or down-light only) configuration. It also offers a thin diecast backplate that keeps the fixture snug against the wall.

The [Rook 250 interior round pendant](#), meanwhile, is a beautiful, slender solution ideal for open-ceiling applications where downlight performance is required in a more strikingly decorative manner. Maximizing a 2.5" aperture, the Rook 250 comes in two distinct sizes: full (9-inch height) and mini (just under 4½-inch in height). Single-point suspension, surface and single-circuit track mounting options are available.

Alternatively, the [Rook 250 Mini Frame Mount](#) offers a remote driver in the most convenient location: above the fixture. Perfect for a trimless, clean and minimal aesthetic, the Rook 250 Mini Frame Mount allows for more driver options and accommodates EM battery packs.

Other Rook interior and exterior lighting solutions include the:

- [Rook 3.5" Round Pendant](#)
- [Rook 3.5" Round Pendant with Dim-To-Warm](#)
- [Rook 3.5" Square Pendant](#)
- [Rook 3.5" Square Pendant with Dim-To-Warm](#)
- [Rook 4.75" Round Pendant](#)
- Rook 3.5" [Round](#) and [Square](#) Interior Wall Mounts
